

# FILTRATION SYSTEM PRC 1

## Waste Water Treatment

This unit is design for waste water treatment of flexographic washout residues, it is design to remove all solid from water to provide water re-usable into the process.

**SYSTEM Patented**

- ▶ The PRC 1 is designed to treat waste water from any developing plate
- ▶ The PRC 1 is available for 250 l/hour of water treatment
- ▶ No chemistry added
- ▶ 100 % re-usable water

### Key features

- ◆ Reliable operation
- ◆ Robust design
- ◆ Best-in-class waste water capabilities
- ◆ Remote diagnostic
- ◆ Environmentally friendly system

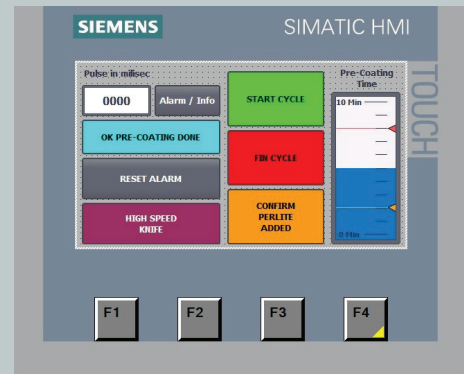

## SPECIFICATION

A unique system patented by GS-Trading without chemistry added to your waste water will allow solid separation and re-usable water in the processor

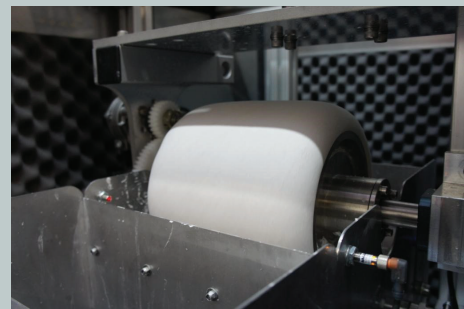

Combine with a program cycle to get good reaction is controlled by PLC via touch screen

## TOUCH SCREEN CONTROL

Unique Device

Dry residue

Conforms to: 2006/42 EG
